# JENSEN JET ELECTRIC LIGHTNING 10" GUITAR SPEAKER

Thunderous guitar tones

**FOR:** Ten-inch replacement speakers. While the Fender Super Reverb has immortalized Jensen as the iconic 10" speaker to beat, the Jet Electric Lightning series satiates hungry loyalists looking for something more aggressive than Jensen's previous offerings. Possibly because of the Super Reverb association, "tens" have never really caught on with the heavy crowd. Given the success of the 12" Electric Lightning, we were excited to throw this baby into our resident high-gain 10" combo and crank it. The tight-but-present bass, warm mids and ear-friendly highs sounded very much like the most popular 12" high-gain speakers on the market. If you've been looking for something more from your tens, try some Lightning.

**NOT FOR:** 4x12 cabinets.
